Specialty Eye Institute Creates Custom Vision

As the premier providers of eye surgery and LASIK in Mid-Michigan and Northwest Ohio, our team of board-certified ophthalmologists and optometrists are committed to providing the highest quality in eye care service tailored to your individual needs. Our specialists provide care for: cataracts, glaucoma, macular degeneration, diabetic retinopathy, retinal tears and detachments, eye infections, and laser vision correction.

You Have a Choice

When selecting your doctor

With something as precious as your eyesight, choosing the best ophthalmologist is important. Look for experience, longevity, and leaders in technology.

New Technology for Cataract Patients

The ORA system acts as a guide during advanced cataract surgery by providing real-time calculations to help provide more precision in IOL power, cylinder power and lens orientation. In other words, surgeons can make adjustments during the surgery based on real-time information, instead of only relying on measurements taken before the procedure.
