

1

2

3

4

5

6

The American Academy of Pain Medicine

1. Eudynia

2. Maldynia

- ◆ **Eudynia** (nociceptive pain)

- Aka... normal physiologic response to an event/injury
- Acute & "beneficial"
- Tylenol, works on nociceptive receptors (CNS)

7

Eudynia: Physiological pathway of pain

1. Injury → peripheral nociceptors
2. synapse in the dorsal root ganglion →
3. signals of pain to the brain
4. inflammatory mediators are released
5. again stimulate the nociceptors,
6. Releases Substance P

8

The American Academy of Pain Medicine

- ◆ **Eudynia** (nociceptive pain)

- ◆ normal physiologic response to injury (muscle or soft tissue)
- ◆ acute, but can also be persistent (e.g., cancer pain).
- ◆ Sprains
- ◆ Fractures
- ◆ Cuts

9

The American Academy of Pain Medicine

- ◆ **Maldynia** (neuropathic pain)

- Lesions or dysfunctions in nervous system
- Not well measured
- Doctors have difficulty correlating pathology to level of pain

10

The American Academy of Pain Medicine

Maldynia (neuropathic pain) often results in significant dysfunction it is not well measured with our current testing abilities

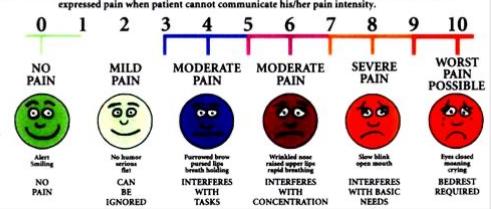

11

Drug addiction and maldynia pain
Pain doctors dilemma????

UNIVERSAL PAIN ASSESSMENT TOOL

This pain assessment tool is intended to help patient care providers assess pain according to individual patient needs. Explain and use 0-10 Scale for patient self-assessment. Use the faces or behavioral observations to interpret expressed pain when patient cannot communicate his/her pain intensity.

12

Types of Pain (Oral) Meds

1. NSAIDS (Topical and oral)
 - ASPIRIN
 - IBUPROFEN
2. Acetaminophen
3. Narcotics

PAIN ASSESSMENT CHART

Schedules of Controlled Substances Act 1970

13

Ocular Pain

1. Trauma
2. Surgical (notify MD)
3. Conjunctiva
4. Lids/lashes
5. Lacrimal system
6. Cornea
7. Iritis / Hyphema

14

Ocular Pain

3/17/21 15

15

Oral Pain Medications

- ◆ REVIEW
 1. ASPIRIN (ASA & Ibuprofen types)
 2. ACETAMINOPHEN
 3. RX for NARCOTIC

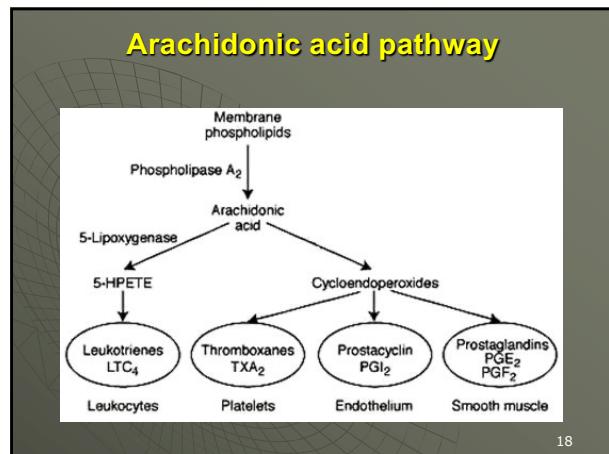

3/17/21 16

16

Oral Pain Medications: Aspirin & NSAIDS

- ◆ 4 actions (ASA & NSAIDS)
 1. Analgesic
 2. Anti-pyretic
 3. Anti-inflammatory
 4. Anti-platelets
- ◆ Uses
 - HA's, muscle aches, "pains"
 - Inhibit clotting
- ◆ COX (inhibitors)

17

I. Aspirin

Aspirin
Acetylsalicylic acid (300-500mg/tab)
Limited for mild pain
81mg (baby) for anti-clotting

+ CEILING EFFECT! (law of diminishing returns)
DEAD @ 30grams
Optometry?????

Dose
1 tab 400mg qid (PO)
40,000 tons Rx'd/yr

19

20

Aspirin

ASPRIN → HOW THE NAME CAME ABOUT

A = Acetyl chloride
SPIR = apiraea Ilmaria (plant from which salicylic acid was derived)
IN = familiar name ending for medicines in 1800's

21

To add an oral agent

- Plan:
 - Vigamox/zymar
 - Topical NSAID
 - Bandage SCL
 - ASA
 - ◆ Bayer 400mg QID PO x 2 days
 - ◆ Is it rational???

22

NSAIDS

NSAIDS

- ~20 kinds in the markets
- All reversibly bind COX₁ & COX₂
- ~19% have GI upset
- + CEILING EFFECT

23

IBUPROFEN

24

What is the issue?

- ◆ GI
- ◆ ASTHMA
- ◆ BLEEDING

3/17/21

25

Side effects NSAIDS / ASA

- GI upset 15 – 20 %
- Worsening of asthma
- Bleeding episodes
- Rash

Contraindications to NSAIDS / ASA

- Active GI disease
- Bleeding disorder
- Asthma
- Pregnancy or Lactation
- Chronic KIDNEY / LIVER disease
- Post surgery
- HTN (?)

25

26

To add an oral agent....

- ◆ 55 yr old male
- ◆ Double vision & HA (↑ing)
- ◆ DM & HTN
- ◆ SLE: clear
- ◆ Fundus: NPDM ou
- ◆ IMP:
 - CN #3 paresis
 - Secondary HA
- ◆ Plan:
 - Sed Rate
 - Motrin
 - ◆ 400 mg 1 tab q6-8 hr (PO)

27

New NSAID's: COX2 inhibitors

COX2

- ◆ less GI upset
- ◆ QD/BID dosing
- ◆ Less influence on clotting

◆ Celebrex (sulfa derivative)

1. May ↓s the ability of ACE inhibitors
2. Don't use with **adv** KIDNEY disease
3. DO NOT use **ASTHMATICS**
4. 100 (PO BID) to 200 mg po (qd)

27

28

AN IRRITIS THAT WON'T GO AWAY

- ◆ REFERRED FOR AN IRRITIS EVAL
- ◆ On PF 1% qid (os)
- ◆ Prolensa qd
- ◆ 3+ / 4+ photophobia
- ◆ A "7 – 8" on pain scale
- ◆ 2+ conj inj
- ◆ NO SPK
- ◆ 1 + cells

3/17/21

29

Add an oral agent....

- ◆ IMP:
 - mild irritis
 - Intense eye pain!?!?
 - KEY...inflam causes PAIN
- ◆ PLAN:
 - ↑ PF 1% q1h OS (awake)
 - Prolensa bid
 - Celebrex
 - ◆ 200mg 1 tab q 24 hrs (PO)
 - RTC 3 days

3/17/21

29

30

NSAIDS - MYTH

- ◆ NSAIDS are less effective for pain than narcotics but are safer.

3/17/21

31

Case: “Excedrin & Right sore lid”

- ◆ Past 4 days LT eye sore
- ◆ 35 female
- ◆ Va 20/20
- ◆ **Self medicating**
 - Excedrin...not sure what kind
 - “makes me feel better and eye less red”

32

32

Acetaminophen (Tylenol)

TYLENOL

- ◆ Analgesic similar to ASA
- ◆ Anti-pyresis via hypothalamus
- ◆ NO anti-inflammatory properties!!!
- ◆ DO NOT use with alcoholics (hepatic failure)
- ◆ Why is tylenol a wonder drug?????....

33

Acetaminophen (Tylenol)

Uses:

1. Can't use ASA or NSAID (allergic)
2. NO GI issues (ulcers)
3. *SAFE for children and kids*
4. *SAFE for pregnancy*
5. *SAFE for asthmatics*
6. NO chance of Reye syndrome

Side Effects

- ◆ Liver impairment
- ◆ Caution: ≥3 alcohol drinks/day
- ◆ Allergies
- ◆ **Leading drug**
 - **CYP450/NAPQI**

34

To add an oral agent

- ◆ Plan:
 - Vigamox/Zymar
 - Topical NSAID
 - Bandage SCL
 - Tylenol
 - ◆ 1 Tab 500mg QID (PO)
 - ◆ Warn pt about > 4gm/day

35

35

What about Pregnancy

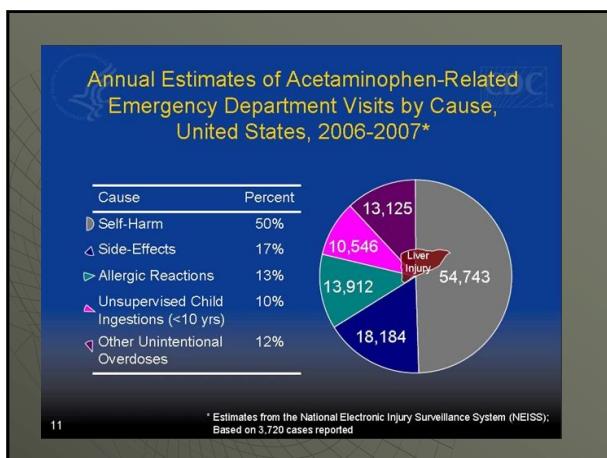

Classes

- “A” fine for preg women
- “B” OK to use (prenatal vitamins **Tylenol & Alphagan** etc...)
- “C” drugs shown to be harmful to the fetus
- “D” have significant risk to fetus
“*only when the alternative is worse*”

Remember: get more people involved in the decision ☺

Safefetus.com

36

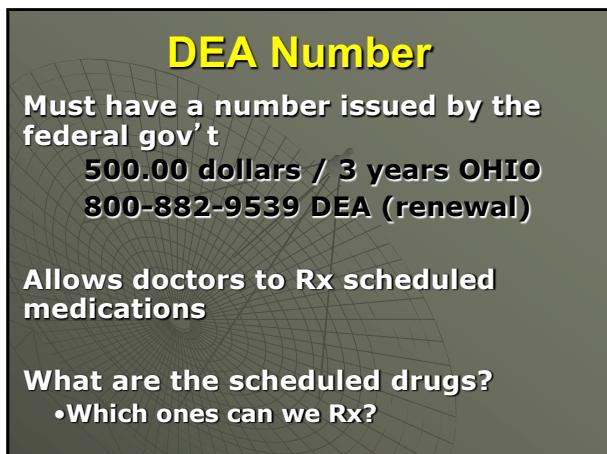

37

1. **Ibuprofen** (Motrin, Advil, Nuprin)
 - Advil = 200, 300, 400, 600 mg q6-8 hrs
 - Motrin = 400 mg Q 4-6 hrs
 - Nuprin = 100 mg Q 4-6 hrs
 - **Can use at 6 months of age**

2. **Indomethacin** (Indocin)
 - 25, 50 mg TID (**ADULTS only**)
3. **Anaprox** (Aleve)
 - 220, 275, 550 mg Q 6-8 hrs (550 starting dose)
4. **Aspirin** (Bayer)
 - 1 TAB q 3-4 hours (up to 6/DAY)
5. **Celebrex**
 - 100 mg BID or 200 mg (QD)
6. **Acetaminophen** (Tylenol) 250 & 500MG
 - Regular 2 tabs (q 4-6 hrs) NO more than 12/DAY
 - Extra strength, 2 pills (q: 4-6 hrs) NO MORE 8/DAY
 - **Kids (Chewable)**; 2-3yrs (2 tabs); 4-5 yrs (3 tabs); 6-8yrs (4 tabs)
9-10 yrs (4 tabs); 11-12 yrs (6 tabs)

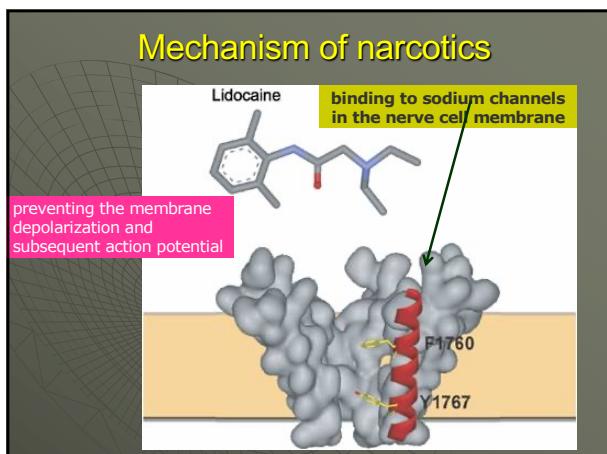

38

39

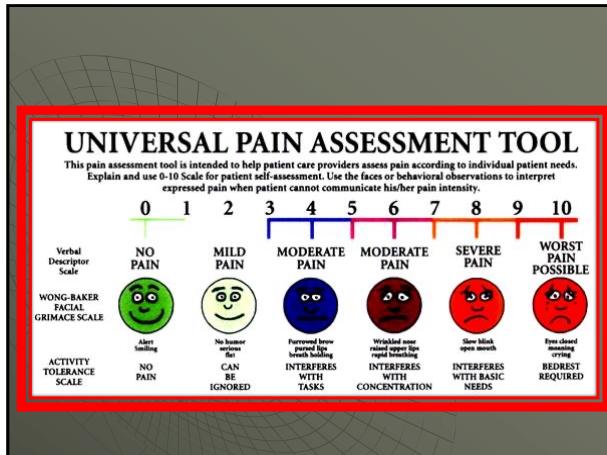

40

41

- ### Classes of Narcotics
- Natural Opiates**
- Morphine
 - Full agonist to CNS receptors
 - Heroin
 - Methylmorphine " Codeine "
- Synthetic Opiates**
1. Meperidine "Demerol"
 2. Propoxyphene "Darvocet"
 3. Oxycodone "Percocet"
 4. Hydrocodone "Vicodin"
 5. Methadone
- Controlled Substances Act 1970...**

42

43

Controlled Substances

Schedule I

- High abuse liability & **NOT** approved medical uses
- Marijuana, THC, LSD, Heroin, Peyote, Cocaine

Schedule II.....use for optometry?

- Have a HIGH potential for abuse
- Physical & Psychological dependence (severe)
- aka "Narcotics"** → **NO REFILLS NO CALL INS**
- Oxycontin, Oxycodone (Percodan & Percocet), Meperidine (Demorol), Methadone, Hydromorphone, Morphine, Methylmorphine, Mepergan, Phenobarbital, Ritalin, Amphetamines, **VICODIN**

44

Controlled Substances

Schedule III

- Carry some potential for abuse
- Less severe physical dependence
- HIGH psychological dependency
- Can be called in BUT 5 refills X 6 months**

Examples:

Tylenol #1, #2, #3

#4, Anabolic steroids, Amphetamines, Barbiturates, Opium, Phendimetrazines (adipost, Anorex-SR, Appecon, Melfiat, Obezine, Phendiet)

45

Controlled Substances

Schedule IV

- Very low potential for abuse & min dependence
- Can have on 5 refills in 6 months
- High medical use (in terms of value)
- can call in RX's

Examples:

Talwin, Talacen, Xanax, Valium, ChoralHydrate,Chlordiazepoxides(Librium), Flurazepam (Dalmane), Lorazepam (Ativan), Meprabamate (Deprol) Restoril, Halcion, Ambien

46

Controlled Substances

Schedule V

- Minimal potential for abuse
- Are subject to state and local regulations
- States can not lessen Fed'l laws BUT MAY toughen Fed'l laws**

OCT's

Examples

NSAIDS, Acetaminophen, Aspirin,

Benadryl, Night Quil, Robitussin (Codeine) Neurotin (anti-epilepsy)

47

OXYCONTIN

Oxycodone (Percodan, Percocet, Tylox, **Oxycontin**)

- Schedule II narcotic**
- 10-12X analgesic effect of codeine
- HIGH addiction**
- Moderate to severe pain
- OxyContin: taken every 12 hours: 10, 20, 40, 80 & 160 mg**

Oxycontin / Tylenol = Percocet, Endocet, Roxicet & (Tylox = 5mg Oxy & 325/500mg Tylenol)

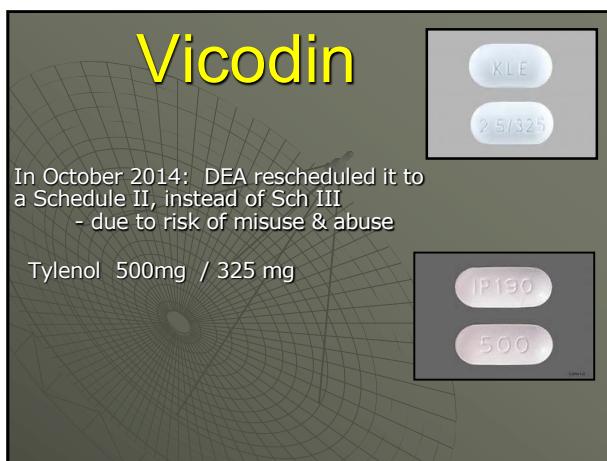

Oxycontin / ASA = Roxiprim, Endodan & Percodan (4.5mg Oxy & 325 ASA)

Oxycontin / Ibuprofen = Combunox

Oxycontin (con't release) = OxyContin, Endone, OxyNorm, Percolone, OxyFAST, Supeudol & Roxicodone

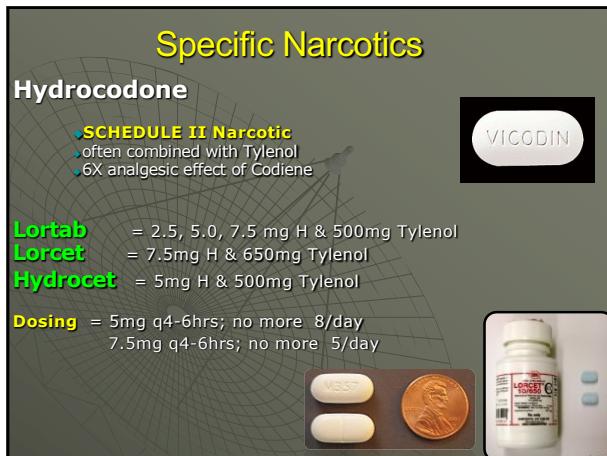

48

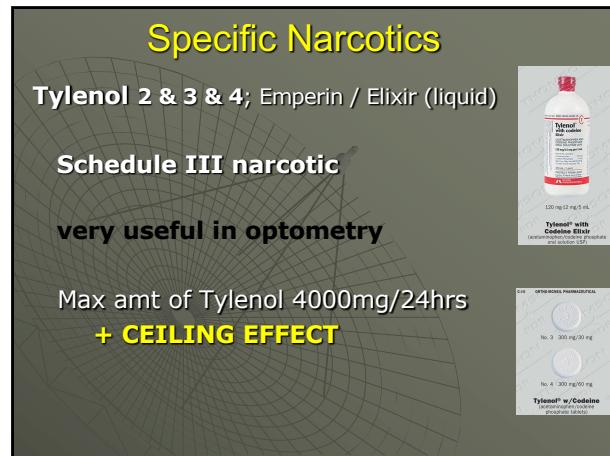

49

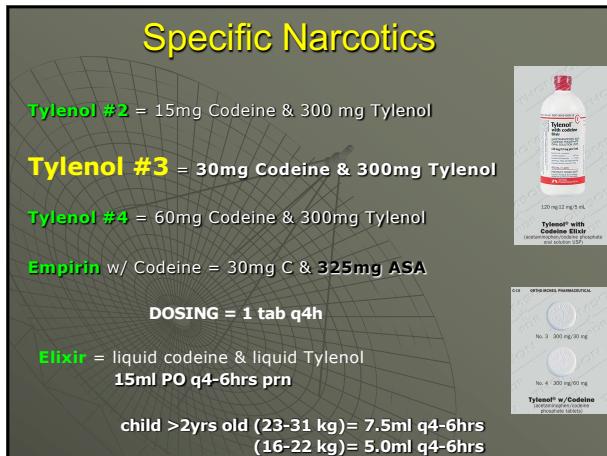

50

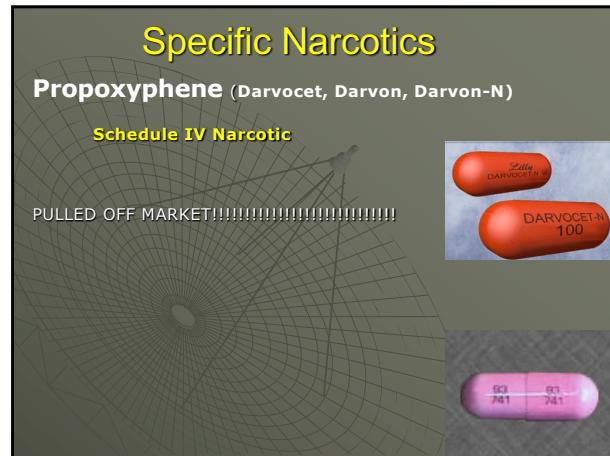

51

52

53

54

Specific Narcotics

Pentazocine (Talwin NX, Talacen)
less respiratory effects
weak analgesic comparable to ASA & Tylenol
Naloxone counteracts morphine like effects
Schedule IV narcotic

Talwin NX = 50mg P & 0.5mg Naloxone
Talacen = 25mg P & 650 Tylenol

55

Narcotics: Side effects

1. CNS Depressant or Stimulant
2. Light-headedness
3. **Sedation**
4. Nausea/vomiting...esp in ambulatory patients
5. Inhibits gastric mobility (constipation)
6. Mood elevation
7. **Respiratory depression (most serious)**

56

Finger nail to the cornea

28 years old
"wrestling with his sons"
Night & Day contacts
Hx: + ulcers (gastric) & IBS
VA: 20/60
SLE: + abrasion, no cells/**no infiltrate**
retina clear

Plan:?????

57

PAIN Management (if you chose)

- ◆ 1 -3 day duration
 - ◆ Mild - moderate pain (short-term)
1. **Ibuprofen** 400mg q4h
 2. **Tylenol** 1 tabs 500mg q4-6h
 3. **Tylenol #3** 1 tab q4h x 3 days
30mg Cod/ 300mg Tylenol
 4. **Vicodin** 1 tab q4-6h x 3 days
5mg H & 500 Tylenol
 5. **Lortab 7.5** 1 tab q4-6h X 2 day / 500mg Tylenol

58

PAIN Management

- ◆ 1 -3 day duration
 - ◆ Mild - moderate pain (short-term)
- Plan:
1. SCL ...?????
 2. Vigamox qid
 3. Nevanac tid
 4. Tylenol 500 mg qid po
 5. Homatropine 5% in office
 6. RTC 2 Days

59

PAIN Management

- ◆ 1 -3 day duration
 - ◆ Mild - moderate pain (short-term)
- Plan:
1. SCL...?????
 2. Vigamox qid
 3. Nevanac tid
 4. **Vicodin ES** 1 tab q6-8h(po) prn
7.5 H & 750 Tylenol
 5. Homatropine 5% in office
 6. RTC 2 Days

65

Meds for severe pain

Trade	Generic	Dosing
Demerol	Meperidine	5 to 10 mg every 3 to 4 hours
Dilaudid	Hydromorphone	2 to 4 mg every 4 to 6 hours
MS Contin	Morphine Sulfate Extended Release	30 to 60 mg every 12 hours
OxyContin	Oxycodone Extended Release	10 to 80 mg every 12 hours
Percocet 10/650	10 mg Oxycodone/ 650 mg APAP	one tab every 6 hours

66

14 years old: child hit with a grape at school cafeteria

Mom: "Can't deal with the pain."

Pain relief?

- Clark's rule: Ped dose equals

Adult dose / 150

30mg TID / 150 = 1/5

1/5 (30mg) = 6mg TID for a child

♦**Empirin** w/ Codeine = 30mg C & 325mg ASA....**NO!!!!!!**

♦Codeine #2 1 tab Q 6hr X 3 days PRN

♦Elixir = liquid Codeine & liquid Tylenol

15ml PO q4-6hrs

67

Mr Keller

1. 81 yr male
2. Meds: Elavil, HCTZ, Synthroid, ASA 81mg
3. Dacryocystitis 1x/ year
4. Va NLP od; 20/20 os
5. Lumigan (qhs) os
6. Very PAINFUL !

68

What analgesic?

Either Tyenol #3 or #4

Lortab 5.0mg/ 500mg Tylenol

Tramadol(50mg) tab q-4hrs prn

No → if Hx of seizures or if taking MOA inhib, Tri-cyclic anti-depr or SSRI

Concerns:

Evavil is a TCA (works on NorEpi & Serotonin)
